

WORKSHOPS 2024

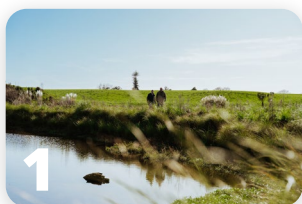

Reimagining a low emissions future for Te Tai Tokerau Northland

We are returning to Northland with some thought provoking scenarios developed from initial community work in 2023 and we want your feedback.

These workshops are designed to collect feedback from those in the communities across Te Tai Tokerau Northland about how they would envisage a low emissions future in the region might look in these different scenarios.

Earlier this year, we met with key industry connections in Whangārei where we learnt about what is important to the community in forming a healthy, lower emissions future for Te Tai Tokerau/Northland.

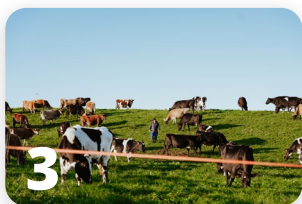

As a result of the collaboration with rural and urban communities, four future scenarios were developed:

1 Diversity is a new speciality

2 The world's food basket of choice

3 Feeding the world

4 Green shoots

We will be running five workshops across the region in February 2024 to share, test and refine these scenarios with farmers and growers throughout the region.

If you are curious about what each of these scenarios entail, we would love to hear from you. The goal for these workshops is to test these scenarios and get your input into how they should be developed further, and collect as much feedback as possible from those attending.

What's in it for you?

- ✓ Provide invaluable input on what a lower emissions future might look like in Te Tai Tokerau Northland
- ✓ Your communities voice will be presented to decision makers in this space
- ✓ \$100 koha to acknowledge time and contribution in the form of a prezzy card or a donation to a chosen charity.
- ✓ Great opportunity to network with other farmers and growers in your community to share your thoughts on an important topic

Where and when?

We will be in Northland from the 19th - 23rd of February 2024. Current locations are:

- Whangārei – 19 February 2024
- Kaikohe – 20 February 2024
- Kaitaia – 21 February 2024
- Dargaville – 22 February 2024
- Wellsford - 23 February 2024

Cost

Costs are covered by the NZAGRC: New Zealand Agricultural Greenhouse Gas Research Centre. Morning tea and lunch provided.
